# Template Dashboard Application

**Pratap Cheruvu**  
Sr. Technical Consultant

## Business Problem

The client has over 50 branches and over 100 data types in TeamSite. It has become hard for the users to login to the TeamSite and drilldown to each branch and workarea and then find and edit the DCRs. A portal like solution would serve the provided new Login screen for the users where they can enter the TeamSite Username and password. Integrated JSP/J2ee with CSSDK to validate entered Username and password. Once user successfully login to the Dashboard application, it will show only the corresponding DCRs owned by him/her with “edit” and “properties” features.

## Solution Overview

A dashboard application was developed and integrated into the portal. The user will see all the DCRs created by them on one screen. The solution utilized TeamSite CSSDK to integrate with TeamSite.

## Implementation details

The portal has a separate login screen. Once the user enters the TeamSite login credentials, the DCR list is displayed as below

<input type="checkbox"/> Name	Modified By	Modified ▾		
<input type="checkbox"/>  manager_test.xml	rc8891	Jan 11, 2009 11:34:...	Edit	Properties
<input type="checkbox"/>  manager2.xml	iwui	Jan 10, 2009 9:32:1...	Edit	Properties
<input type="checkbox"/>  manager3.xml	iwui	Jan 10, 2009 9:32:0...	Edit	Properties
<input type="checkbox"/>  manager.xml	iwui	Jan 10, 2009 9:32:0...	Edit	Properties
<input type="checkbox"/>  flash-manager.xml	iwui	Jan 10, 2009 9:31:5...	Edit	Properties

TeamSite Content Dashboard

Users then can straightway edit the content and generate the files.

The application is built using Java, J2EE, Struts framework and TeamSite CSSDK technologies.

## Business Benefits

Content authors are very happy using this application as they don't need to understand the TeamSite UI. They can easily find and edit the content. At times the client wants to give only limited access to content authors if the content authors are contractors. This application satisfies even this requirement as well.

## About TechAspect

TechAspect is a leading IT company with main focus on implementing and integrating enterprise content management systems, websites and web applications. We build client-facing websites that are fast, easy and compelling. Our content management solutions enable business users to have full control on development, publishing and management of web assets. Some of the world's renowned organizations have chosen TechAspect, including: Anritsu, Affymetrix, Avon, BCBSMA, Genentech, Hertz, Oracle, Intermec and Phillips-Van Heusen.
