

Transform Your Risk into Reward

The Strategic Approach

Answering the call for higher quality applications goes beyond designing a comprehensive test program. It extends into creating and maintaining stronger quality processes executed by a competent team. At TechAspect, we don't believe in an adhoc approach to quality assurance – we firmly believe in a strategic one. By applying a strategic approach to your unique business needs, TechAspect can help plan, manage and conduct a thorough and effective testing of your applications.

What's involved and how it works

TechAspect smartQA is a customizable and transparent testing process to manage the risks associated with developing and deploying critical IT solutions across various technologies and industry domains. It is the most efficient and effective way to ensure that your applications are as reliable as possible.

smartQA provides a real return on investment, not only through identifying and mitigating risk early in the investment lifecycle, but also by utilizing reusable test modules thus helping bring down costs by avoiding the need for a remediation in later phases.

And testing is not just about reducing risk and return on investment - it is also about increasing control. By aligning the testing objectives with your business

How TechAspect Differs

TechAspect is experienced in both Traditional and Agile development environments and are capable of selecting the right approaches, tools and techniques to maximise the return from testing and utilisation of the testing team. To ensure your applications is as reliable as possible, we test what users can do to it, not just what the designers expected them to do.

By establishing dedicated Testing Center of Excellence (TCoE), TechAspect delivers a comprehensive and robust solution with a high level of standardization. Our cross-project approach to testing also ensures efficient re-use of resources, testing and test ware.

TechAspect has a vast experience in testing on various environments/domains and technologies. These include

- » Client-Server, Enterprise Applications, Web Applications, CMS Tools
- » Manufacturing, Media, Publishing, Insurance, Healthcare, Financial Services
- » C, C++, VB, Java, J2EE, Dot Net, webMethods, TIBCO, SAP, Oracle Applications, PeopleSoft, IBM Websphere, WebLogic, Oracle, SQL Server, DB2, Informix, Sybase.

Our Clients will benefit from our testing services in the following ways:

- » Risk Mitigation—where early detection of defects improves time-to-market and reduces cost
- » Introduction of Industry Best Practices—to facilitate efficient, effective application development, regardless of location(s)

objectives, smartQA helps transform your risk into reward.

TechAspect smartQA service offerings includes:

- » Requirements Verification and Gap Analysis
- » Test Strategies Development
- » Test Planning (estimation Delphi/UCP)
- » Test Scenario/Test Case Design and Development
- » Test Execution (Agile Model)
- » Defect Management
- » Configuration Management

- » Enhanced Requirements Management and User Satisfaction—through the use of an independent Q/A organization

Testing is a core component of the applications development lifecycle and essential to quality assurance. Testing is the means of achieving two major objectives:

- » Verification
To confirm the work product meets specified requirements
- » Validation
To confirm that the work product will fulfill its intended use

TechAspect testing service framework and approach was designed to provide a efficient methodology for testing which enables our customers to achieve the above objectives as a result of:

- » Improved applications quality and reliability
- » Reduced risks
- » Reduced project time-line
- » Lowered project cost
- » Reduced/Eliminated applications errors and production failures.

TechAspect have proven experience of establishing from scratch highly efficient test teams. No matter what your testing requirement, be it Test Management, Test Automation, Performance Testing, or simply a quick test of your website before you put it live, you can be sure we have the capability and expertise that you need.

TechAspect

About TechAspect

TechAspect is a leading IT company with main focus on implementing and integrating enterprise content management systems, websites and web applications. We build client-facing websites that are fast, easy and compelling. Our content management solutions enable business users to have full control on development, publishing and management of web assets. Some of the world's renowned organizations have chosen TechAspect, including: Anritsu, Affymetrix, Avon, BCBSMA, Genentech, Hertz, Oracle, Intermec and Phillips-Van Heusen.
